# FLOWER applications

Pandora Flower Power collection distinguishes itself for its chromatics and its decisive approach, as well as for its background painting of huge flowers, representing sunflowers, narcissuses, daisies, noble roses, water-lilies, anemones, lilies, tulips, etc. The range of subjects plays with the knowledgeable compositions following the muses of Murano Smalto, Glimmer and Waterglass collections. The differing material consistencies and perspectives of the three collections together give a variety of reflections and coloration that make the chosen floral theme even more vivacious.
